Explanations on the Operating Results and Financial Conditions

The following are notes to the changes in principal financial indicators of the Company: During the Reporting Period, the global semiconductor industry continued its positive trend, with strong demand in emerging application fields such as new energy vehicles, AI, and low-altitude economy. The Company precisely focused on market demand, actively implemented the product-leading strategy, and continued to increase R&D investment to drive the continuous improvement and upgrading of the high value-added product matrix. The Company continued to deepen its global industrial chain layout, accelerate overseas capacity building, with rapid growth in overseas sales revenue and strong momentum in globalization development. At the same time, the Company has deeply committed to lean production, advancing refined management and control of the entire process, achieving significant results in cost reduction and efficiency improvement, steadily enhancing the quality and efficiency of operations.
